Name

Ludwig Ramsey

Constituency

Spire Chesterfield

Chesterfield Cycle Campaign supports the creation of a joined up network of cycle routes in and around Chesterfield with segregation from vehicles and pedestrians.

Do you support that statement?

Yes

We are interested to hear your reasons.

The Labour party supports healthy lifestyle and a greener economy. If we can encourage more people to get active these cycle pathways could help to achieve the.

Derbyshire County Council has almost completed a cycle route from the south of Dronfield to Tupton & the 5 Pits Trail and have recently consulted about creating an east west route from the Royal Hospital to Brookside.

Please let us know your thoughts about these two routes.

We support theses routes but need to do more to encourage people to use them.

Both of those routes use the 'station link' walking and cycling path south of the railway station. Do you have an idea how many cycle journeys are recorded on that link daily?

Between 75 and 150

Do you agree in principle with reallocation of roadsapce to create safe cycling infrastructure?

Yes

Let us know why

Do you already, or would you consider using a bicycle for local journeys around Chesterfield? Please let us know reasons why or why not.

Yes i use a bike but as I live in a flat they have no allocated bike storage which makes it difficult.

Given a climate emergency can cycling play a local transport role?

Yes so would encourage employers to get a bike to work scheme.

Please let us know if you think any of these would be useful in Chesterfield from the list below:

Bicycle hire at the railway station

Free bike checks and basic repairs

All new developments connected to cycle network

Any thing else you want tell us?

I would like to see school journeys where parents and children can use a bike to school or walk to help the greener economy we want to achieve
